ferag.easychain

Fast and flexible
in all directions

#perfectmatch

You can find more information online:

With the continuous and seamless conveying system **ferag.easychain**, even narrower curve radii can be realized than with the “bigger brother” ferag.deniway.

This is particularly noticeable when complex, three-dimensional layouts are required. In addition, the highly modular system can be quickly installed and converted. The system is based on rollers that reduce friction and thus both energy consumption and wear. That is why ferag.easychain is robust, reliable and largely maintenance-free.

ferag.easychain: **Applications**

Linkages between production processes

End-of-line processes

Transport of SLC

ferag.easychain: **Benefits**

Conveying, sorting and distributing in one system

3D-capable for optimum space utilisation

Material flow over long distances with no transfer points

Modular and extensible design

Energy-efficient technology thanks to rolling friction

Proven and reliable technology

Cost-effective in operation, service and maintenance

Low-noise

ferag.easychain: **Technical data**

Product dimensions max. 600x400x400mm / min. 20x20x20mm

Maximum conveying speed 1.0 m/s

Maximum loading 20 kg/m / 5 kg per plate

Installation weight 10 kg per running meter

Conveying plate width 300 mm

Chain/plate pitch 85 mm

Curve radii 750 mm

Installation Elevation or suspension

Inclination 7.25°

Spiral pitch 600 mm per circuit

Spiral segmentation every 90°

ferag.easychain: **Peripherals / interfaces**

Front-side infeed and discharge as well as pushers depending on the conveyed goods

Identification by barcode or RFID

Material flow controller (MFC)

Interfaces to WMS, WCS and peripheral systems

Company for **Innovative Intralogistics Solutions**

Ferag specialises in the development of total intralogistics solutions in the areas of production, e-commerce and omnichannel for a wide range of industries as well as for postal and 3PL automation. The Swiss family-owned company, which has been on the market for over 65 years, is also one of the world market leaders in the development, design and distribution of material flow systems for a wide range of industrial applications. Innovative conveying and sorting solutions for intralogistics are also a consistent and sustainable further development of the Ferag processing systems developed for print media production. Software and automation solutions are developed in-house and implemented by Ferag's own teams. The group of companies, headquartered in Hinwil/Zurich, is represented in more than 18 countries by its own sales and service companies and employs around 600 people worldwide.
